Ferris H. Lander specializes in complex patent portfolio development for chemical, biotechnology, and medical instrument technologies, and has assisted clients in licensing, merger and acquisition negotiations. He also counsels clients on all aspects of patent prosecution matters, including re-examination, reissue and petition procedures.

Prior to joining McHale | Slavin in 1998, Mr. Lander was a Primary Examiner in the chemical and biotechnology groups of the U.S. Patent & Trademark Office (USPTO) for more than 25 years. At the USPTO, his docket included biological water purification, gas treatment, membrane separation, biological soil remediation, and specialized chemical and biological fertilizers and plant treatments. Before joining the USPTO, Mr. Lander was a Polymer Additives Chemist with the Ciba-Geigy Corporation in Ardsley, N.Y.

Mr. Lander is actively involved in a number of organizations advancing biotechnology and life sciences in Palm Beach County.
